AGENDA FOR TELEPHONE INTERVIEW

Sir:

I would like to request a telephone interview on May 12, 2004. There has been no previous Examiner interview conducted. Please consider the following topics for discussion:

- Bhatt et al. does not teach classifying processes into one of a plurality of process classifications. The Examiner notes that P1, P2 and P3 of Figure 5A are three elements of data display. (claims 1, 17, 18 and 35)
- Applicants submit that the three display elements P1, P2, and P3 represent different processors and indicate the percentage of time spent in various activities. The activities being application execution, communication overhead and idle time.
- There is no classification of processes in to process classifications which are, for example; system, support, marketing, skilled, promoted, games and bad. This classification is supported by Figure 5 and page 19 of the current specification.
